Akhilesh Dangi

Akhi | akhileshdangi | akhileshdangi7@gmail.com | 7023335477

Data-driven professional with **4.7 years** of experience in the **Banking Industry**, currently working in the **Credit Cards department at ICICI Bank**, with expertise in **Business Analysis**, **Data Analytics**, and **Data Science** methodologies, driving operational performance and informed **decision-making**.

EDUCATIONAL QUALIFICATION

- **IIT (ISM), Dhanbad | B.Tech.- Electrical Engineering** [2016-2020]

WORK EXPERIENCE

ICICI Bank Ltd | Policy Manager Credit Cards [May'23 - Present]

- Built a dynamic **Power BI dashboard** to monitor monthly **portfolio KPIs** by geography, segment, and sourcing channel, enabling policy exception tracking and **pan-India business reviews** to proactively address high-delinquency zones.
- Strategically reduced **portfolio delinquency** by **35%** through identification of **15%** high-risk segments using **advanced analytics**, **designed and executed** targeted policy restrictions,coordinated **cross-functionally** with Risk and Product teams.And later implemented geo-specific policy relaxations to sustain balanced sourcing while maintaining **portfolio quality**.
- Executed strategic **credit limit recalibration** impacting approximately **30 lakh** customers quarterly, driving 60-70K monthly limit reductions **(avg.53%)** and targeted limit increase offers**(20% conversion, 85K avg.uplift)**,with seamless deployment through comprehensive **UAT**, aligning risk with growth goals.

DCB Bank | Data Analyst- BIG DATA [Jan'22 - May'23]

- Developed **Machine Learning** classifiers for **Sentiment Analysis**, using unlabeled data to identify customer pain points and improve branch-level service.
- Implemented **stratified random sampling**, leading to a notably reduced volume of data available for reporting.
- Conducted **data wrangling** and **data cleaning** to convert raw data into structured formats for effective business analysis.
- Leveraged tools like Pentaho and Spoon to **automate reporting**, enhancing efficiency and minimizing manual effort.

ACADEMIC PROJECTS

Trained an AUTOML Auto & Image Classification

- Created datasets for image and video categorization and training AutoML and importing datasets.
- Send predictions and deploy a model to an endpoint.

Human Activity Recognition

- Aimed to increase the precision of fitness tracking apps for smartphones lowering the dimensionality of sensor data by employing PCA.
- Designed a support vector classifier to categorize human behavior; 95 percent validation accuracy was attained.

TECHNICAL SKILLS

- Python
- Advance Excel
- Advance SQL
- AWS
- PowerBI, Tableau
- Machine Learning
